

DBI-SALA SELF RETRACTING LIFELINES

Industry Leaders

DBI-SALA has been the industry leader in the development of reliable, versatile self retracting lifelines (SRL's). DBI-SALA SRL innovations include the patented Sealed SRL and the impact indicator, an important safety innovation which has now been widely adopted across the industry.

An SRL is a flexible lifeline attached to a mechanism that allows it to extend and retract under slight tension when the user moves away from and toward the device. This enables a user to work safely while moving within a recommended area at normal speeds.

SRL's can be used in a variety of situations, but are primarily used to provide movement and protection of users in a vertical work area. The SRL should be anchored to a location directly above the user. SRL's can also be used with a horizontal lifeline to improve the overall mobility of the system.
