

Zelus' comprehensive Operator Training course for Lift Truck is a cost-effective opportunity to enhance your employee safety, equipment reliability and mitigate risk by having our industry experts as your partner.

Operational proficiency through our specialized training.

We conduct a thorough pre-operational inspection before the hands-on practical assessment. Recognizing the significance of elevating your employees to meet the highest standards for your internal responsibility program, our hands-on training involves your staff actively engaging with the equipment, gaining familiarity with controls and establishing a solid foundation of knowledge before deploying it on your worksite.

Protect your people, your equipment and your business!

Our thorough training enhances safety and productivity, cutting maintenance costs by equipping operators and supervisors with the knowledge and tools to safely operate equipment, understanding responsibilities, regulations, qualifications, and procedures.

Let us help you provide a safe working environment in your facility. Contact us today for any additional information or to schedule your next training session.
